Till time's last sand : a history of the Bank of England, 1694-2013

by Kynaston, David, - **2017** - Copies: 1 of 1 available

Till Time's Last Sand by David Kynaston is the first authoritative and accessible single-volume history of the Bank of England, opening with the Bank's founding in 1694 in the midst of the English financial revolution and closing in 2013 with Mark Carney succeeding Mervyn King as Governor. This is a history that fully addresses the important debates over the years about the Bank's purpose and modes of operation and that covers such aspects as monetary and exchange-rate policies and relations with government, the City and other central banks. Yet this is also a narrative that does full justice to the leading episodes and characters of the Bank, while taking care to evoke a real sense of the place itself, with its often distinctively domestic side. Deploying an array of piquant and revealing material from the Bank's rich archives, Till Time's Last Sand is a multi-layered and insightful portrait of one of our most important national institutions, from one of our leading historians.

Unelected power : the quest for legitimacy in central banking and the regulatory state

by Tucker, Paul M. W., - **2018** - Copies: 1 of 1 available

Unelected Power lays out the principles needed to ensure that central bankers, technocrats, regulators, and other agents of the administrative state remain stewards of the common good and do not become overmighty citizens. Paul Tucker draws on a wealth of personal experience from his many years in domestic and international policymaking to tackle the big issues raised by unelected power, and enriches his discussion with examples from the United States, Britain, France, Germany, and the European Union. Blending economics, political theory, and public law, Tucker explores the necessary conditions for delegated but politically insulated power to be legitimate in the eyes of constitutional democracy and the rule of law.
